PROFILE

A detail-oriented student from University Tun Hussein Onn Malaysia (UTHM) with a Bachelor of Computer Science (Software Engineering) with Honours with a current **CGPA of 3.72**. I ensure meticulous attention to every aspect of my work. Additionally, my proficiency in various programming languages, coupled with basic networking knowledge and experience in website development, enables me to translate data into actionable insights effectively. I am proficient in basic Microsoft Office tools, including Microsoft Word, Excel, PowerPoint, and Access. I am capable of working independently and interacting with individuals at all organizational levels. Furthermore, I am adept at collaborating within a team environment. Moreover, I possess a passion for tackling challenging technical problems, which further enhances my capabilities. Moreover, I am familiar with **.NET programming** or automated software testing. In summary, my attention to detail, analytical mindset, interpersonal skills, growth orientation, and problem-solving curiosity position me as an ideal candidate for this opportunity. I am available to commence on **5th March 2025**.
